## T008 Cat Pole Bracket

### Installation instructions

Package contents: T008 Cat Pole Bracket, interface bracket, 4x nuts/bolts, foam pad

Bracket for use on boats with a spinnaker pole .  
Compatible with the Raymarine Race Master and Micro Compass.

- Remove sticky backing from the foam pad and attach to underside of bracket.
- For use with the Race Master, attach the interface bracket to the pole bracket using the 4 bolts/nuts/washers provided. Note that the interface bracket bolts to the front of the pole bracket, and extends upwards.
- Bolt the plastic cradle (supplied with the Raymarine compass) to the bracket.
- Secure bracket to the spinnaker pole using the preferred choice of velcro, cable ties, duck tape etc. **WARNING:** do not place too far along the pole as access is needed to the compass to enable set up procedures.
- Attach a piece of shock chord from the hole provided in the end of the bracket to the mast. This will keep jib and spinnaker sheets clear of your compass.
- For added security, attach a lanyard from the hole provided in the front of the bracket to the spinnaker pole.

Bracket is then a permanent fixture, simply clip your Raymarine compass into its cradle each time you sail.

### **WARNING**

- Compass is accurate only when mounted within 20° of the vertical.
- Do not lean compass to port or starboard.
- Do not mount within 2' or 0.6 m of magnetic objects.
- Note that a conventional compass is a magnetic object.
