

## PRESS RELEASE

### **FUSION® Entertainment launches new speaker and subwoofer lineup at Cannes Yachting Festival 2019**

**| 10-15 September 2019 | Stand QML179, Vieux Port |**

Fusion® Entertainment, a worldwide leader in marine audio entertainment, brought the power of music to the waters of the French Riviera at this year's Cannes Yachting Festival, with the debut of its new Flush Mount Series of speakers and subwoofers.

Designed with a minimalist, clean look, the new FM Series speakers have a mounting profile of no greater than 2.5mm, so they sit almost completely flat against a vessel's interior – a stylish and aesthetically-pleasing finish never seen before on a marine speaker. The matching 10" 400 Watt FM Series subwoofers have a mounting profile of just 3mm, offering an easy way to add impressive bass to your onboard audio entertainment experience<sup>1</sup>.

In true Fusion style, the speakers and subwoofers offer a quality audio experience like no other. Combining optimized speaker drivers inherited from the iconic XS Series speakers with aluminium dome tweeters, the FM Series speakers produce quality audio at all volume levels, to deliver the best audio entertainment experience while out on the water. With the matching FM Series subwoofers, which have been built for versatility and ease of integration, users can easily create a 2.1 audio zone with simple installation and

less cost. The 7.7" 200 Watt and 6.5" 120 Watt speakers, and matching 10" 400 Watt subwoofers, are available in black or white and in a round or square design, to suit all tastes.

"We have specifically designed this new range of speakers and subwoofers with our European customers in mind," said Peter Edward, managing director, Fusion Entertainment. "We know that they want something that looks exceptional, a flush design to complement the modern aesthetics of their boats, without compromising on the impressive audio quality that they've come to expect from us. This new portfolio of stylish speakers and subwoofers will not disappoint."

Fusion is at the forefront of product engineering and design for audio entertainment and is dedicated to offering innovative solutions that enhance personal leisure time on the water. Fusion, owned by Garmin, builds products that exceed regulatory standards using the latest technologies at Garmin's international ISO accredited manufacturing facility. By complying with the requirements of ISO12216, a first for a marine audio entertainment brand, the FM Series of speakers and subwoofers have been built to the highest industry standards.

Carrying Fusion's True-Marine accreditation, the FM Series is IP65 weatherproof and designed to withstand the harsh marine environment, which makes the full range perfect for both indoor and outdoor installation. Fusion also offers an industry-leading three-year warranty.

The new series launched on Axopar, Invictus, Azimut, and Windy Boats at Cannes Yachting Festival. For more information on Fusion's Flush Mount Series and its full line of audio products visit [www.fusionentertainment.com](http://www.fusionentertainment.com).
