FUSION® INTRODUCES THE COMPACT RA70 MARINE STEREO

*Entertainment Leader Announces Full-Featured Waterproof Stereo System
for Space and Budget Conscious Boaters*

Auckland, New Zealand – FUSION® Entertainment, the worldwide leader in marine audio engineering, announced today the release of a new compact and cost effective series, the MS-RA70 and MS-RA70N.

Featuring a sleek front face finish with a shallow-mount case design, the new FUSION audio system delivers clear and dynamic sound reproduction in a marinized, space-saving chassis for flexible installation options. Engineered to seamlessly replace any standard DIN-sized car stereo, the low-profile MS-RA70 design allows for easy integration without the need to redesign the dash space. Cost-effective and easy-to-use, the MS-RA70 offers a powerful entertainment solution for boats with a busy helm.

The FUSION MS-RA70 allows independent control of the balance and volume level in two separate audio zones. This Multi-Zone™ technology also includes naming zones, linking of zone 1 and 2 together, or setting volume limits. An additional line out and sub out are included and linked to Zone 1 for the optional inclusion of an amplified speaker set or subwoofer, with sub filter and sub level controls enabled in Zone 1.

With Bluetooth audio streaming, users can stream music from any compatible device to the MS-RA70. Boaters can enjoy audio apps such as Pandora, Spotify and Apple Music with the ability to adjust volume from both the stereo face and the connected device. The FUSION-Link Bluetooth remote app for Android and Apple devices is compatible with the MS-RA70 and allows the user to navigate available sources and browse music collections from compatible USB flash drives, as well as adjust zone volume control from a smartphone or tablet. Mobile devices can be charged via the USB connector located at the rear of the unit or include a FUSION MS-CBUS3.5 panel-mount auxiliary connector for quick access to the USB socket.

“Innovation sometimes means rethinking what works best for the customer,” said Chris Baird, managing director, FUSION Entertainment. “The MS-RA70 is a compact, affordable audio solution that is feature-packed and built to our highest standards. Every boater deserves to hear the FUSION sound.”

The widescreen LCD display is optically bonded to improve durability and eliminate the possibility of condensation or fogging while on the water. The MS-RA70’s LCD display is also

able to resist extreme temperatures and operate in direct sunlight. When mounted correctly, the front face of the MS-RA70 is rated IPx7 waterproof – able to withstand the harshest marine environments. The MS-RA70 is engineered with a glass filled composite chassis to eliminate corrosion from dissimilar metals. A world's first innovation, the MS-RA70 can be installed conventionally on the dash or integrated into a glass helm with a flush surface finish by simply removing the faceplate trims and recessing the mount.

The MS-RA70N provides all of the features of the MS-RA70 and includes a standard NMEA 2000® connector for integration with existing networks. Unlocking the power of FUSION-Link wired control, the MS-RA70N is fully compatible with Multi-Function Displays. When connected to a NMEA 2000 network, the MS-RA70N can communicate with any connected FUSION MS-NRX200i wired remote control for added zone control throughout the vessel. With FUSION-Link, the user can control the entertainment experience directly from a connected chartplotter or Multi-Function Display for a truly connected entertainment experience.

FUSION, the leader in marine entertainment, is dedicated to offering innovative solutions that enhance personal leisure time, whether on the water or on the road. FUSION, backed by Garmin, builds products that exceed regulatory standards, using the latest technologies at Garmin's international ISO accredited manufacturing facility.

The FUSION MS-RA70 and MS-RA70N are available for purchase from authorized dealers worldwide. For more information on the FUSION MS-RA70 and MS-RA70N audio entertainment system, FUSION Entertainment or its entire line of marine audio products, please visit www.fusionentertainment.com.
